

School of Postgraduate Medicine
Therapeutics of Skin Conditions
Code: 7LMS0173, Credits: 30, Level: 7

This module aims to develop and consolidate understanding of the skills, knowledge and attributes required for safe, and effective treatment of dermatological conditions. Successful completion will provide a deeper knowledge and understanding of the pharmacokinetics of topical and systemic treatments used to treat skin disease. Students will gain an increased understanding of key factors to consider when choosing treatment options including risk, cost, evidence about efficacy, disease severity, and patient's response to treatment, including potential adverse effects.

Content:

- Assessment and management of common skin conditions which will include acne eczema, psoriasis, skin infections (bacterial, viral, fungal), wounds, urticaria and infestations.
- A range of systemic and topical drug interventions for skin conditions including emollients, topical steroids, anti-infective / antimicrobial agents, wound dressings.
- Specialist drug treatments used in skin conditions, and drugs with special monitoring requirements such as methotrexate and other immunosuppressants, biologics, isotretinoin.
- Monitoring therapy to minimise adverse effects: adverse reactions to drug treatments for skin disease including drug eruptions and drug induced skin disease.
- Legal, ethical, professional and organization policies / procedures / guidelines and codes of conduct relevant to interventions used to treat skin conditions.

Dates:

9th, 10th, 11th Oct 2024 (09.00-17.00)
28th, 29th Nov 2024 (09.00-17.00)
Assessment - Jan 10th 2025 (am).

Venue:

All teaching is face to face at the University of Hertfordshire, College Lane Campus, Hatfield, Herts, AL10 9AB.

Cost:

£1,730 per 30 credit module for Home students commencing in academic year 2024/25. Modular fees remain at a fixed price for the duration of your studies based on year of commencement.
